

A NEW SPECIES

FF 91 FUTURIST

FF 91 Futurist is Faraday Future's all-electric, autonomous-ready, seamlessly connected flagship vehicle. The result of a user and experience focused design process, the FF 91 Futurist represents the most advanced state of intelligence, technology, and performance. The vehicle design is a reflection of our forward-thinking brand values and mission, giving it an unmistakably futuristic appearance.

OUR FIRST FLAGSHIP VEHICLE: REWRITING THE DNA

Beginning with a blank canvas, we established our own code. Driven by minimalism, this process resulted in advanced proportions and a futuristic mono-volume. By creating new technologies and integrating clean mobility and connected digital ecosystems, FF is redefining the future of the automotive industry – and moving humanity forward.

THE THIRD INTERNET LIVING SPACE

Our form language intentionally puts technology on display. It moves through a spectrum of functional details held by an advanced language of colors, materials, and finishes.

The total experience is transcendent. FF's Software, Internet and Intelligence DNA is uniquely capable of building the next generation of highly personalized experiences on a cutting-edge electric vehicle platform.

VPA
(VARIABLE PLATFORM ARCHITECTURE)

The VPA is designed around a robust skateboard platform housing a modular battery system. The platform is designed to meet or exceed all crash safety requirements and enables many electric motor configurations and future vehicle variants.

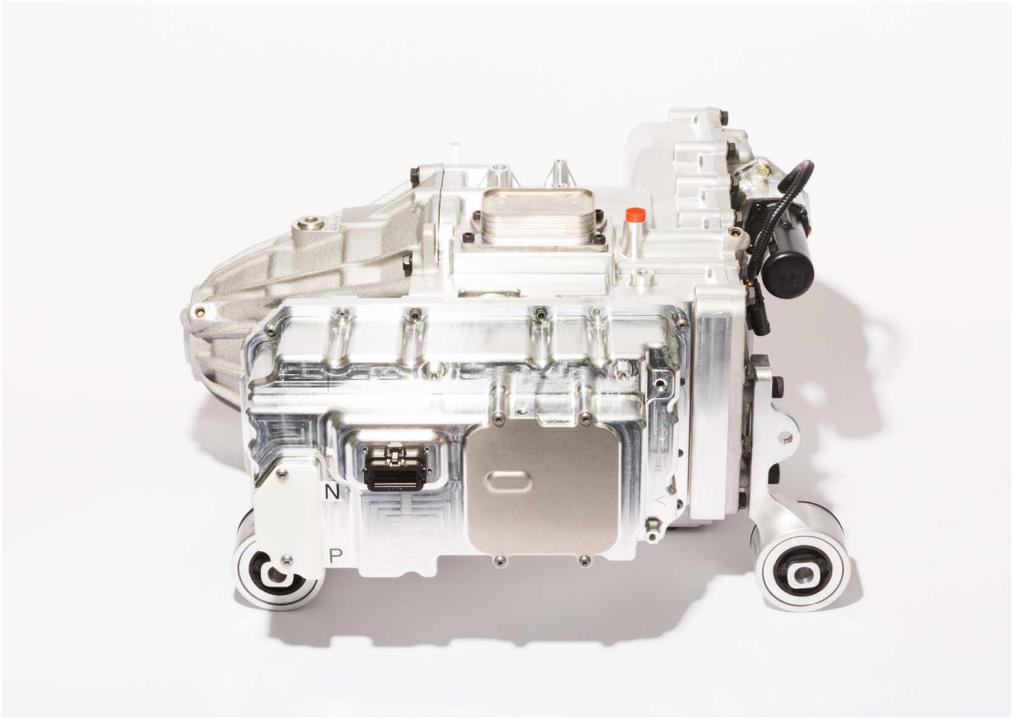

DRIVE UNIT

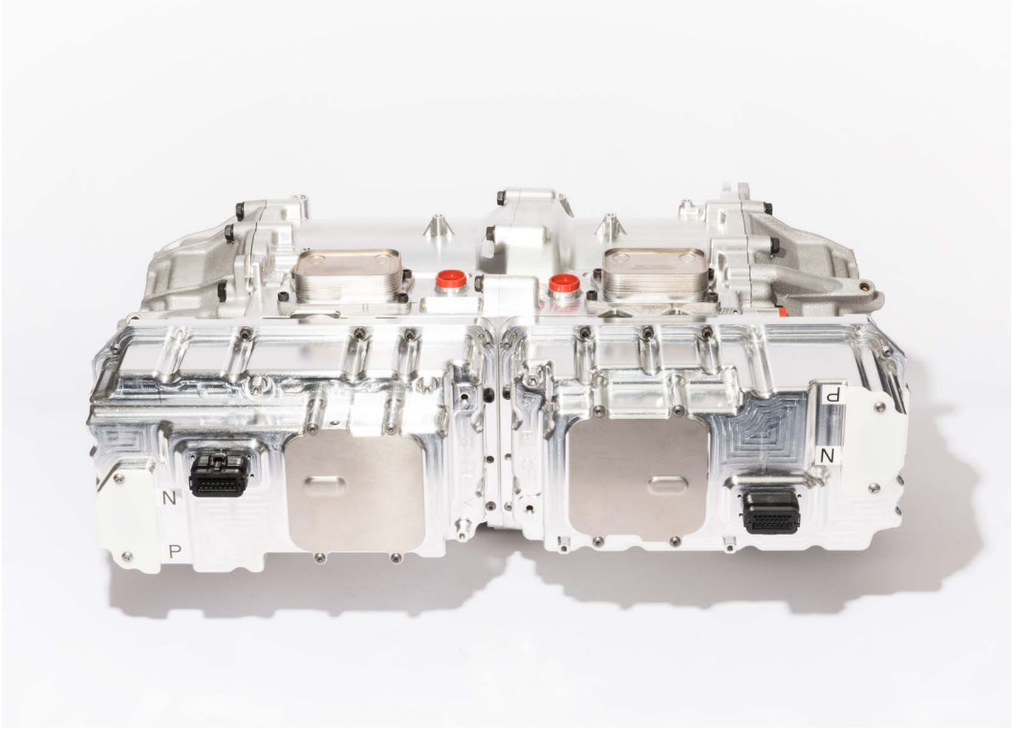

Powerful, efficient and compact integrated electric motor drive units.

INLINE COAXIAL PLANETARY TRANSMISSION

SINGLE MOTOR DRIVE UNIT

DUAL MOTOR DRIVE UNIT

FF 91 SPECIFICATIONS

Key Specifications

- UP TO 378 MILES EPA / 700 KM NEDC RANGE FROM 130 KWH BATTERY PACK
- PATENTED SUBMERGED LIQUID BATTERY COOLING TECHNOLOGY
- 1,050 HP POWERED BY 3 HIGH PERFORMANCE ELECTRIC MOTORS
- 0–60 MPH IN LESS THAN 2.40 SECONDS
- ALL-WHEEL DRIVE, ALL-WHEEL STEER AND REAR-WHEEL TORQUE VECTORING
- LENGTH 206.9"
- WHEELBASE 126.0"
- WIDTH 78.2"
- REAR LEGROOM 48.9"

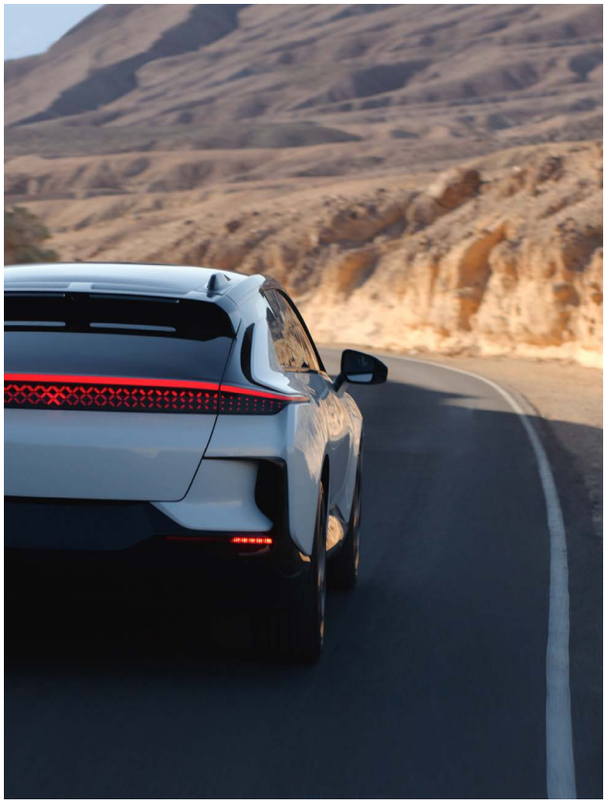

Key Technology

- WORLD'S FIRST SEAMLESS ENTRY WITH MULTIPLE FFIDS
- OVER 100" OF HIGH-RESOLUTION VIEWING AREA ACROSS 11 DISPLAYS
- LIGHTSPEED INTERNET CONNECTION WITH SUPER MOBILE ACCESS POINT
- STATE-OF-THE-ART MOBILE MOVIE THEATER AND VIDEO CONFERENCING
- NASA INSPIRED ZERO GRAVITY SEATS WITH INDUSTRY LEADING 60° RECLINE
- SPA MODE – IMMERSIVE AUDIO-VISUAL EXPERIENCE, HEPA FILTERED AIR, AND VENTILATION & MASSAGE
