

Dag Reckhorn

VICE PRESIDENT, GLOBAL MANUFACTURING

Dag Reckhorn is responsible for developing Faraday Future's (FF) global manufacturing strategy and oversees the execution of all of the company's manufacturing plans. In the first quarter of 2016, Dag and his team will kick off the construction of FF's first manufacturing facility, a \$1 billion Nevada plant that will create more than 4,500 jobs. Prior to joining FF, Dag was the VP of Operations for Webasto Roof Systems, where he oversaw four plants and managed a team of more than 1,000. At Tesla, Dag oversaw vehicle manufacturing for the Model S from 2009 to 2013. Dag was at German Coachbuilder Karmann for nearly 16 years before becoming CEO of LSP Automotive in South Carolina, which he saved from bankruptcy.
